

Quality Management ISO

ISO 9001 is an international standard that outlines the requirements for a quality management system (QMS).

It was developed by the International Organization for Standardisation (ISO) and was first published in 1987. The latest version of ISO 9001 is ISO 9001:2015, which was published in September 2015.

The standard is based on several quality management principles, including a strong customer focus, the motivation and implication of top management, the process approach, and continual improvement. These principles ensure that ALXR consistently meets the needs of its customers and stakeholders, as well as regulatory and legal requirements related to its products and services.

There are several benefits to ISO 9001 that is certified and independently accredited:

- **Improved efficiency:** By following the requirements of the ISO 9001 standard, ALXR can streamline its processes and eliminate waste, leading to improved efficiency and productivity.
- **Increased customer satisfaction:** By consistently meeting customer requirements and continually improving its products and services, ALXR can continuously improve customer satisfaction and loyalty.
- **Enhanced credibility and reputation:** ISO 9001 certification is a widely recognised mark of quality and builds credibility and enhances our reputation in the marketplace.
- **Greater competitive advantage:** By demonstrating ALXR's commitment to quality, it can differentiate itself from its competitors and gain a competitive advantage.
- **Easier access to new markets:** Many organisations, particularly in the public sector, require their suppliers to be ISO 9001 certified. By obtaining certification, ALXR can expand its customer base and access new markets.
- **Improved communication and documentation:** The ISO 9001 standard requires ALXR to have documented processes in place and to establish effective communication channels. This can help to improve the flow of information and facilitates decision-making.
- **If you would like more information about ISO9001:2015 or would like advice and guidance on obtaining ISO9001:2015 for your organisation, please contact us or arrange a meeting at a time and date to suit by clicking on this link here**
- **The ALXR ISO9001:2015 is accredited by UKAS**

About UKAS

UKAS (United Kingdom Accreditation Service) is a non-profit organisation responsible for the accreditation of organisations. UKAS is the national accreditation body for the United Kingdom, and it operates in accordance with international standards such as ISO/IEC 17011, which sets out the requirements for accreditation bodies.

UKAS is recognized as a competent and reliable accreditation body by a number of organisations, including the European Union, the International Accreditation Forum (IAF), and the World Trade Organization (WTO).

The features of UKAS accreditation are:

- **Independence:** UKAS is independent of both the organisations it accredits and the bodies that regulate them. This helps to ensure that its accreditation processes are objective and unbiased.
- **Competence:** UKAS has a thorough and rigorous process for evaluating the competence of organisations seeking accreditation. This helps to ensure that only organisations that meet the required standards are accredited.
- **Credibility:** UKAS is widely recognized as a competent and reliable accreditation body, both in the UK and internationally. This helps to enhance the credibility of organisations that are accredited by UKAS.
- **Consistency:** UKAS follows a consistent process for evaluating the competence of organisations seeking accreditation, ensuring that all organisations are held to the same high standards.

- **Recognition: UKAS is recognized by a number of organisations, including the European Union, the IAF, and the WTO. This recognition helps to ensure that the accreditation provided by UKAS is widely accepted and respected.**
